EDUCATION

Vellore Institute of Technology B.Tech, Computer Science and Engineering

Sep 2023 – May 2027

CGPA: 9.15 / 10.0

EXPERIENCE

Full Stack Developer Intern The Cognitive – Toronto, ON, Canada (Remote)

Aug 2026 – Present

- Building a web application for a client based in London, handling the project end to end on my own – the front end in React and the back end in Node.js.
- Take the requirements given to me, turn them into the pages users see and the API routes and database work behind them, and send regular updates on what is finished and what is still pending.
- Test my own work before handing anything over – checking the flows a user would actually follow – and make the fixes and changes the client asks for after they review it.
- Manage the codebase myself in Git, keeping the work in clear commits and branches so the client's team can pick it up later.

TECHNICAL SKILLS

Languages: Java
Frontend: React.js, JavaScript, HTML, CSS
Backend: Node.js, Express.js, Django
Databases: MongoDB, MySQL
Tools: Git, GitHub, AWS S3

PROJECTS

Pahal Foundation: NGO Web Platform [\[Live\]](#) [\[GitHub\]](#)

2026

Django, Python, JavaScript, Razorpay, AWS S3

- A web platform for an NGO that educates underprivileged children. It moved student admissions, student records, daily attendance and volunteer sign-ups off paper.
- Added the Razorpay payment gateway for online donations, with payment verification and a record kept of every transaction.
- Built separate dashboards for admins and teachers to manage admissions, attendance, volunteers and media files, with the files stored on AWS S3.

Classroom Portal: Educational Platform [\[Live\]](#) [\[GitHub\]](#)

2026

React.js, Tailwind CSS, Node.js, MongoDB

- A digital classroom in one place – teachers set homework, students submit it, teachers grade it with feedback, and parents can see attendance, grades and progress.
- Built the full homework flow: setting deadlines, submission and resubmission, grading, a reusable question bank and a resource library. Login uses JWT, with separate access for four types of users.
- Added scheduled background jobs that email deadline reminders and new-grade alerts, and made the site installable as a PWA with announcements and teacher – parent messaging.

Yatra Saral: Train Travel Platform [\[Live\]](#) [\[GitHub\]](#)

2025

React.js, TypeScript, Node.js, Express.js, MongoDB

- Covers a train journey end to end: seat and group booking with e-ticket generation, live train tracking, platform services (cloak room, coolie, wheelchair), pantry food ordering and travel insurance.
- Sign-up with email OTP verification and password recovery, plus a profile area for ticket download and cancellation, booking history and saved passengers.
- Made it usable for elderly and low-literacy travellers – Hindi/English interface, read-aloud support and adjustable font sizes.

CERTIFICATIONS

- **Oracle Certified Foundations Associate - Agentic AI**
- **ServiceNow Virtual Internship Program**
- **Networking Basics**
- **AWS Technical Essentials**

Oracle University, 2026
ServiceNow University / SmartBridge, 2026
Cisco Networking Academy, 2026
AWS Training & Certification, 2025
